**SIGN-FOAM® still stands the test of time better than any other HDU!**

- **Will not warp, crack or decompose** – Your sign as well as your reputation will remain intact for many years to come.
- **Is unaffected by moisture or temperature** – Can be used in virtually any outdoor environment.
- **Highly chemically resistant** – Allows for the application of any paint finish.
- **Superior cell structure** – Saves you time and money while painting.
- **Contains an Anti-Static additive** – Causes chips and particles to fall to the floor, less dust in the air.
- **Densities of 10, 15 & 18 pounds per cubic foot** Making it easy to choose the right material for the job.
- **Sheet sizes of 4'x 8', 4'x10', 5'x 8' & 5' x10'** and thicknesses from 1/2" up to 12" thick.
- **NOW GREEN! 240 recycled bottles in every sheet!\*** Same reliable product, now environmental friendly. Why choose any other HDU?

After more than twenty years of industry leading innovation, we are pleased to announce our most significant improvement ever, **Sign-Foam is now GREEN!** In a process over two years in the making Sign-Foam is now manufactured with a minimum of 16% post consumer recycled material. Now we know what you may be thinking, 16% sounds like little more than a good start. And we agree, we are not done yet, and we won't stop here, but let's take a minute and tell you what 16% actually means. Let's look at a 4'x8' sheet of 1.5" 15lb. Sign-Foam a true workhorse of our product line. Each sheet weighs 60 pounds, which means that this one sheet contains 9.6 pounds of recycled plastic, which is the equivalent to over 240 plastic water bottles! **Think of it, for every sheet of Sign-Foam sold, we together, are keeping 240 empty water bottles worth of plastics out of our nations landfills.\*** We, with your help, are literally keeping tens of thousands of water bottles out of our landfills each and every month and that is something we think we can be very proud of and so should you!

So you keep doing your part, and we'll keep doing ours and together we can make the world a more beautiful place by creating more beautiful signs above ground and keeping far less used plastics below ground.
